Subject: Pictures of Hannah Volunteering in the lab

Thought you guys would like to see these. Hannah is an I-LLID fellow to whom I was assigned as a secondary mentor. When she came in to see the lab, we talked about this treatment and she volunteered to do it! Right now she is dry cleaning the book - battle maps by the hour of Antietam - then we'll try removing some of the tape -- and finally we'll make a nice housing for it!

Subject: hours to complete the book/ before treatment pictures

Hannah has done 80.5 hours, of which, I would say that approximately 75 were for the treatment! I've attached a before treatment photo, though it's just an image of the first page of the book. I did adjust the white balance in photoshop, but the copy stand lights are pretty horrible. Thanks for coming down and seeing Hannah's work!
